

## 970978 Toilet Paper Stitching Instructions

Material Needed:

Water Soluble Stabilizer

Roll of Toilet Paper

1. Frame two pieces of stabilizer in a hoop larger than the toilet paper square.

2. Take the first good piece of toilet paper on the roll and lay it centered on the hoop (we used temporary adhesive spray to hold it in place).

3. Choose an embroidery design and load it into the machine.
4. Embroider the design.

5. Take out of hoop without tearing the toilet paper off the roll. Roll the paper back onto the roll and adhere with moisture on the end to stick it to the roll again.

6. Place on display for your guests to see.
