Instructions for So Big Growth Chart

Items you will need for this project:

Material for Square Blocks

1. Embroider designs onto the fabric of your choice.
2. Align and pin the ruler to the design right sides together, make sure the bottom and top of the designs line up evenly. Sew the seams together on the left side only, using the edge of the design as a guide where to stitch.

3. Cut off excess fabric on the seam you just sewed, leaving a 1/4 inch inseam. Press open, leaving the ruler on the left side. (Leave the material on remaining sides until the end) Repeat until remaining pieces are sewn.

4. Align and sew the top and bottom piece together in order according to the ruler scale. (Smallest inches at the bottom)

Formats: art, dst, exp, hus, jef, ofm, pes, vip, vp3, xxx

5. Once all panels are sewn together, cut a 1/2 inch seam around all remaining sides.

6. Cut a piece of fabric for the back, the same size as the entire growth chart. Place them right sides together, pin and sew 1/2 inch leaving a gap for turning inside out. Snip the corners so they will box better.

7. Turn the design right side out, box the corners with a scissors, and hand stitch the opening shut. Finish the panel by stitching 1/4 inch decorative stitch around panel.

8. Your Growth Chart is complete. To hang you can add a ribbon, string or ring to the back of the panel.
