

Hoop tear-away stabilizer.

1. Sew the outline stitch.
2. Cut out the stabilizer on the stitch line for your template.
3. Lay the template with the top down on the back of the fusible adhesive.
4. Trace the template on the back of the fusible adhesive.
5. Apply the fusible adhesive piece to the back of the fabric.
6. Cut out the fabric applique shape.
7. Embroider the design until it completes the outline stitches.
8. Heat apply the precut applique.
9. Embroider the rest of the design.

Designs may have multiple appliques.
