Instructions for Christmas Ornaments

Items you will need for this project:

Fibrous water soluble stabilizer

Material for Appliqué

Spray adhesive

Note: The outline color change varies for each design. You may want to wind your bobbins with coordinating thread so the back is as pretty as the front of the ornament. Or tape a piece of matching fabric on the back of the hoop, during step #3

1. Hoop two pieces of fibrous water-soluble stabilizer.
2. After the outline is stitched remove the hoop from the machine.

3. Spray the back of the fabric for the applique with adhesive spray. Lay fabric over the outline stitch and stitch the tackdown stitch and stop the machine.

4. Cut the fabric along the stitch line. Get as close to the stitches as possible.

5. Continue sewing the rest of the design.

6. To make the ornament without the loop on top, skip the last color run step

7. Cut away the stabilizer. Use a small brush or Q-tip to apply water to dissolve excess stabilizer. Add ribbon or string to hang. Your ornament is complete!
